anymore?

Talk title *

Beyond the Hype: Practical Steps to Establishing and Scaling Your Data & ML Team

Talk description *

Join me for a deep dive into a down-to-earth data story that has been overshadowed on the stage. While discussions around cutting-edge technologies like genAI, ChatGPT, and deep learning, this talk shifts the spotlight to what truly matters for companies—practical data analytics and real-world machine learning applications.

Learn why enabling data-driven decision-making and automating tasks with machine learning are the keystones that can make a difference, particularly for companies transitioning from start-up to scale-up. We'll explore the essential steps in establishing a data team, proving the product-market fit of a new, small data team in a scale-up environment, essentially a data start-up within your company.

This talk explains how to kickstart a data team, establish a robust data platform, and implement the first data analytics and machine learning use cases. With the new data team proving its value, it's crucial to avoid getting stuck when experiencing a scaling challenge. Drawing parallels with the growth pains often experienced by expanding engineering teams, we'll use concepts from their experience to navigate the challenges and scale your data initiatives effectively.

Elissa Verseput

Data Team Lead
@Sympower

Hi!

- ML Engineer by craft
 - 2x scale-up
 - 2x corporate innovation
- Now nearly 3 years in data leadership in green scale-up
- Sustainability enthusiast

Journey of today

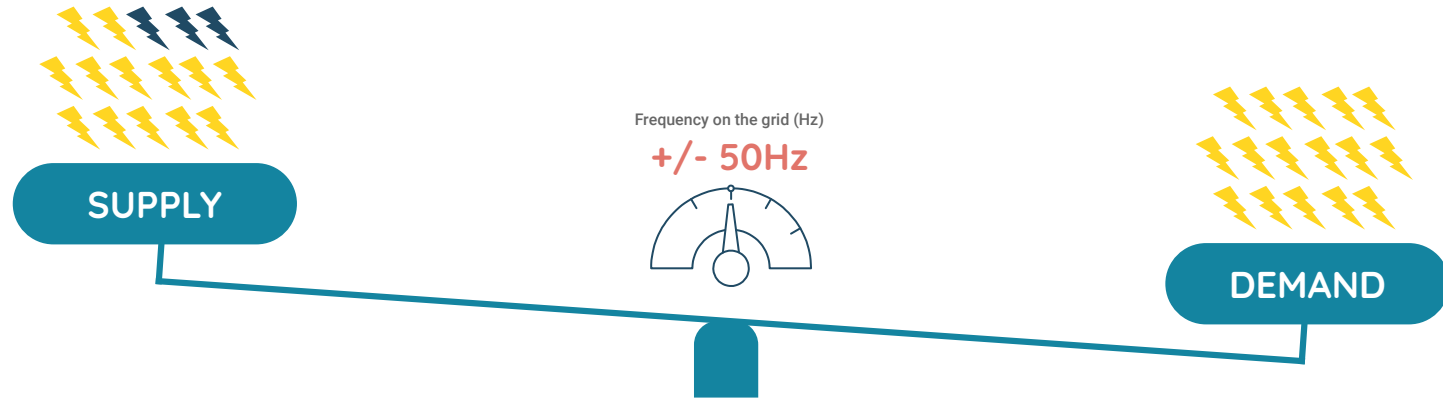

- Evolving data for 3 years in a scale-up
- Each year a new story: new phase, new challenge
- Actionable takeaways how to progress

All with 'normal' ML and Analytics

2022

Joining a green energy tech scale-up

DATA REQUEST: Invoicing FCR-D

Hi Data team!

It was just right after your message Ellissa that I have a request of data 🤔

I am trying to download controllable capacity per active resource owner for SE1 and the month of May

I am using a query (see thread) that it has worked for downloading data for SE2, SE3 and SE4.

Can you help me with this?

 **Kristian** 🚫 11:02 AM

Yearly and hourly market, offered and accepted capacities and prices for them. FCR-D down & up, FCR-N and FFR

Instance 🇫🇮

Urgency: Today preferably

Time: 2022-02-10 23:00:00 - latest values

Hi @Siimo, would you have the time to run the same query as I requested the last time? I would need updated values for the rest of February.

Takeaways 2023

- Manage your top-down data demand
- *First-time data manager: delegate!*
- Spread cognitive load
 - What (Product Manager Data) VS How (Data Team)
 - Different specialists working together in the same team

2024

Growth pain

Data team start 2024

Data team has established product market fit within Sympower

Our products are end-to-end solutions

Full roadmap & budget to grow the team 2x during 2024

However... growth bottlenecks for analytics

Not scaling E2E
approach

Slow feedback
cycle

Increasing bus
factor

Incomplete data
coverage

Accumulating
Tech debt

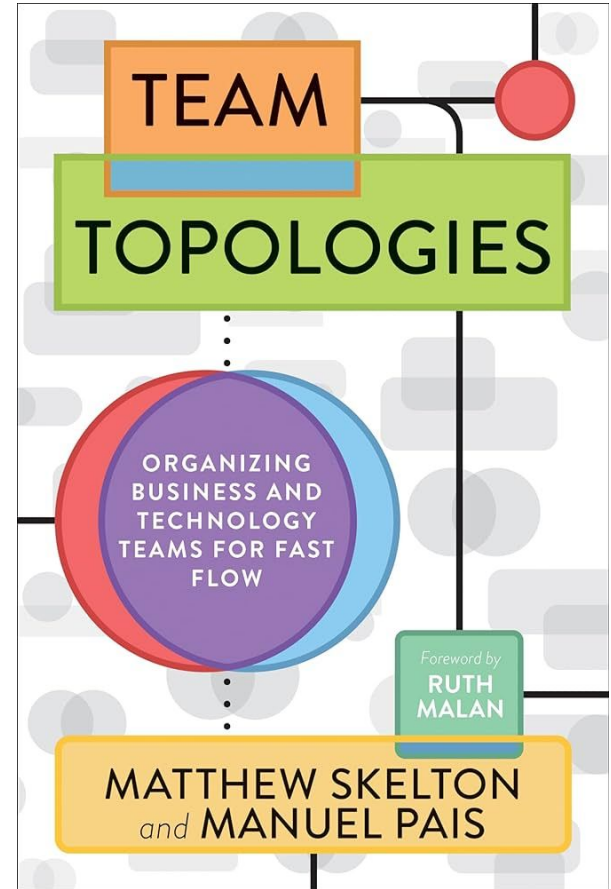

⚡ Challenge 2024

- Growing from 7 to 14 people
- How to best structure the data team(s)
- Scaling analytics

Team Topologies to the rescue

- Seven-to-nine rule
- Cognitive load and domains in team
- Other team purpose options than E2E delivery

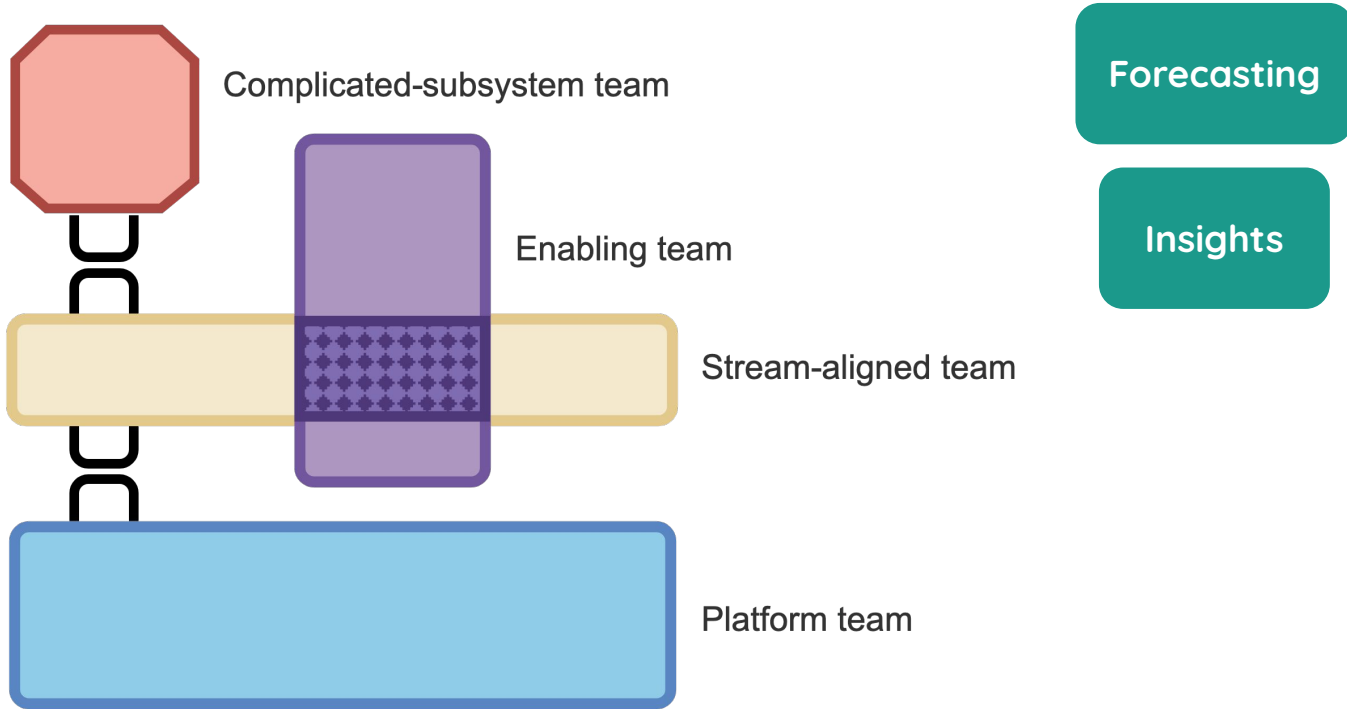

What we do now...

© Matthew Skelton and Manuel Pais from *Team Topologies*

... to ideas how we could start map these responsibilities

© Matthew Skelton and Manuel Pais from *Team Topologies*

Keep E2E VS enabling approach for Analytics

We keep our E2E solution provider approach as it is right now

We start moving towards an enabling approach, where data-savvy business users create their own insights

Upgrades to the way of working

Data-savvy business users → value stream aligned activities

Analytics engineers → enabling team activities

Machine learning engineers → complex sub-system team activities

Data engineers → platform team activities

Takeaways 2024

- In hindsight, pivot faster from E2E approach
- You are not the first one, educate yourself
- Try and learn!

Conclusion, but not the end! Work in progress!
